designed:

* **Unit Value:** 1.0 (one year, 2 semesters, or 3 trimesters equiv.)

* **Is this course classified as a Career Technical Education:** Yes

Name of Industry Sector: Agriculture and Natural Resources

Name of Career Pathway: Agriscience

* **Brief Course Description**

This is a physical science course.?? This is an introduction to all the possibilities in agriculture.?? What a phenomenal opportunity- students learn about the various industries in the agriculture industry as well as all about the FFA and what the future holds as a member. This is when students first have a chance to join the ag department and begin their journey into the AG academy. We will discuss leadership opportunities, conferences, contest, ways to earn money, etc.?? We will explore animal science, plants, floral, ag business, natural resources, even opportunities in ag welding and tractors.?? We will do many hands on activities and labs as well as field trips and invite guest speakers.?? This is a first year ag student course.

Pre-Requisites

Co-Requisites

Algebra I - Required

* **Context for Course**

In the creation of an Agriculture program, we have provided our students a way to obtain UC credit while learning how core subjects integrate with our everyday dealings in the agricultural community.?? By believing in the philosophy of adapting curriculum to meet student needs these courses not only meets graduation and college entry requirements, but also allows students to be part of an agriculture program and FFA.?? Through this, it not only meets the needs of students and school, but that of the community by creating career pathways for students to be involved in.?? Thus creating a well rounded and educated individual for the work force.

* **History of Course Development**

The members involved in the creation of this course were the ag teacher, the principal/director, the assistant director, and the school counselor.
